### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joel Charlton on 10/03/07.

The application has been amended as follows:

In claim 58, line 12, [bar] has been replaced by --member--.

2. The following is an examiner's statement of reasons for allowance: The claim is allowable because the prior art fails to teach a transfer link movable between a first position wherein the transfer link retains the transfer member away from a feed nip, against said bias, and a release position wherein said transfer link permits the transfer member to move toward said feed nip under bias and into contact with a leading segment of sheet material; and an actuator for driving the transfer link from the first position to the release position as set forth in claim 58.

Boone et al. teaches a chassis 12 a detection system (col. 2, lines 67 and 68) and a transfer member 74, but the transfer member 74 uses an angle side portion 78 to retain the transfer member, instead of a transfer link and no actuator is present to drive the transfer link.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
